Report of the School Committee.

Your school committee respectfully submits the following report :

IN GENERAL.

Schools have been maintained this year as last year, in East Douglas, Douglas and South Douglas, pupils being transported from other districts.

The courses of study have been maintained as in the past. In the graded schools at East Douglas progress has been made toward simplyfying the confusion of grades resulting from the changes into the new school house two years ago. It is thought that by the beginning of the fall term the several teachers will find their work more correctly defined in accordance with the standards in general use in the state, so that instead of teaching parts of two, or even three grades in one room, the grades will be really separated. The change is being brought about by the cordial co-operation of the several teachers extending throughout the last two years.

SCHOOL HOUSES.

The town is to be congratulated on the excellent conditions in the new school house at East Douglas. Such a school build-

ing renders every school in it more efficient, and the spirit required to ensure keeping it in good condition is itself a means of education to all concerned.

The school house at Douglas was built many years ago, and leaves much to be desired. One lack is the absence of blackboards. Those now in use do not give so much surface as should be in a school having so many pupils of different grades.

At South Douglas, owing to the small number of pupils, the school house answers its purpose fairly well. The out-buildings should be repaired.

TRANSPORTATION.

There were two men employed to transport pupils to East Douglas, Messrs. Bosma and Guertin, who carried pupils from districts south and north of the village respectively. At the beginning of the last term, as there was only one pupil north of the village who required and used the means of transportation, the committee, with the consent of the family interested, discontinued this route at a saving of ten dollars per week.

STATISTICS.

As last year, the statistics for the school year are made up from Sept. 1st. to Sept. 1st., according to the present school law.

SUPPLIES AND SCHOOL BOOKS.

There should be a good unabridged dictionary in the schools at Douglas and South Douglas, and in the four higher schools in East Douglas. Those in use at present are almost destroyed by long use, and should be replaced. The funds in the hands of the purchasing agent have not been sufficient this year to enable him to make these necessary additions.

Imperative need compelled the purchase of new geographies, readers, Latin text books and algebras, as most of the older books were completely destroyed by long use. The change in

geographies has not been completed, as the larger books of the new series were not published in time to begin the fall term. Money will be needed for this purpose the ensuing year.

CHANGES IN TEACHERS.

Last March the committee found itself face to face with a vacancy in the grammar school caused by the resignation, after more than ten years of efficient service, of Miss Lincoln. Miss Caro Wyman was selected to fill the situation, and the school has gone on with no loss in efficiency.

At the beginning of the fall term, in order to ensure the services of Miss Bumstead for another year, the committee granted a leave of absence which was accidentally lengthened by the failure of a trans-Atlantic steamship company to supply transportation according to its contract with passengers. The committee was fortunate in being able to fill the temporary vacancy by Mrs. Carpenter's services. At the end of the term, however, an offer of a school in Everett caused Miss Bumstead's resignation here, and the committee secured Miss Mary A. Wyman to fill the position the rest of the year.

It would not have been surprising if so many changes had seriously damaged the school, both as regards discipline and scholarship. The committee is pleased to note, however, that notwithstanding the disadvantageous conditions, the grade of work done seems to have suffered no loss, and the discipline of the room is excellent.

SUPERINTENDENCY.

Members of the committee acting as individuals, secured the insertion of an article in the town warrant to see if the town would instruct the school committee to unite with some other town in employing a superintendent of schools.

There is no doubt that the employment of a trained superintendent would increase the efficiency of our school system in many ways. Thorough supervision is impossible under our

present system. Under the law of the state, on or before July 1st, 1902, a superintendent must be employed, either by this town alone, or in union with another one or two towns as may seem best. The law further makes provision where the assessed valuation is below \$2,500,000, for reimbursing the additional expense, providing the number of schools is not less than 14. We have only ten schools, but by uniting with some other town and bringing not less than 25 schools under superintendency, we may have a trained man without materially increasing the expense to the town.

Another alternative is the employment of a high school principal to act as superintendent in addition to his work as teacher. This would make it necessary to employ an additional teacher in the high school, or suffer a loss of efficiency in that important department.

This year the visiting member of the committee has visited the schools two or three times per term, and has met the teachers in a teachers' meeting informally and at irregular intervals. The other members of the committee have attended to financial and disciplinary matters as occasion demanded.
